percentage of transparent coffees:

When buying coffee, we cooperate primarily with the company Nordic Approach, within the regions from which they do not offer purchase, we are also connected with Cafe Imports, Primavera coffee and Sucafina. For most coffees, we are able to present the purchase price that exporters pay in Free On Board status.

We are unable to trace the FOB for the purchase of decaf coffee purchased from Cafe imports, which in our case is the result of a regional blend. In 2023, we registered 1260 kg of this coffee in the warehouse, which limits our ability to be transparent to the result of a percentage significance of 96%.
